

Joyce's German Vocabulary

Ian MacArthur

Joyce's ability as a linguist is well known, but this was not solely due to talent, as notes in MS Cornell 37-244-274: *JJA* 3:074-104 show. These consist of nearly 1200 German words and phrases copied neatly, many taken from a book by Emil Otto,¹ one of the three authors who gave their names to the “Method Gaspey-Otto-Sauer” (*FW* 485.03) for learning and teaching of German. The notebook entries show that when these were recorded, during the Trieste period, Joyce had a basic knowledge and was *expanding* his vocabulary. The notebook, kept by Stanislaus, was not available to Joyce during the later years and so any usage of the words must have been of those committed to memory. Many ended up in *Finnegans Wake*. The list below represents a small subset of the total German in that work, as there are numerous common words which Joyce had obviously already learned and more which he would have encountered at a later stage. Nor can we be sure that all these words *were* used. I signal doubts of a few with a question mark.

There is reason to think that the Cornell material represents a fair copy of what were probably loose sheets of notes, made from Otto and other sources, since the blocks of consecutive units from the numbered lessons in the former are out of order. The first page of Joyce's notes start midway through the 50th lesson in Otto and is wholly taken from there. The second page begins at the end of the 48th lesson and ends at the end of the 49th. The third starts midway through the 48th lesson and ends near the end. This pattern continues with more and more units not apparently found in Otto interspersing blocks from that source. It is also possible that material was lost.

In the appendix below, my notes are enclosed in square brackets. I give Joyce's holograph versions unedited except I have substituted a colon for Joyce's = sign. A number contain compound versions or words used in phrases. Those looking for new revelations will be

disappointed as practically everything here has already been glossed, first by Helmut Bonheim², who adopted a ‘scattergun’ approach, listing every possible German word and phoneme regardless of the context, and later by Roland McHugh³, who fortunately adopted a more selective approach.

I have only located two words occurring in *Ulysses* (both in *Proteus*) but I have made no great search. Cornell 37-262/263, *JJA* 3:092/093 ‘Frauenzimmer = woman’ / ‘schleppen = to drag’. Of course, these may well have come from other sources.

As a small consolation for the lack of new glosses, I offer one little gem among some mathematical terms, which I think has so far passed unnoticed.

MS 47478-60 *JJA* 53:138. (Part of a long holographic addition in the margin of a proof of *Tales Told.*)

Quarrellary. The logos of somewome to that base anything, when most characteristically mantissa minus, comes to nullum in the endth: orso, here is nowet badder than the sin of Aha with his cosin Lil [...] *FW 298.18*

Note: Cornell 37-273 *JJA* 3:103 Base = female cousin
